

Integrate Foundations Readers into Essentials

As explained by the *Simple View of Reading* ($Reading\ Comprehension = Decoding\ Skills \times Oral\ Language\ Comprehension$), all students benefit from developmentally-appropriate content. The most appropriate reading practice will be both phonics controlled, so that the student has the tools to read it successfully, and appropriate in vocabulary, interests, and content for the intellectual abilities and spoken English level of the student.

Use the list below to bridge the gap for your Essentials students. Pre-teach any concepts in addition to the concepts taught in each Essentials unit in order to unlock the tools your student needs to decode the listed reader from our Foundations collection.
